Impressions from Agile Barcamp | Leipzig #agileipzig 2016

ontheagilepath.net/2016/09/impressions-from-agile-barcamp-leipzig-agileipzig-2016.html

By Sebastian Radics

With this post I share my impressions from the awesome Agile Barcamp|Leipzig (#agileipzig) 2016.

First of all, thanks for the perfect organization making it the best impressions 2016 so far! Congratulations for hosting your first barcamp and making it a perfect one.

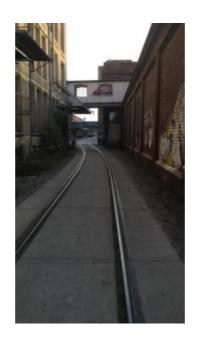

Contents

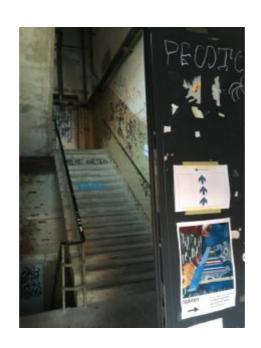

- <u>1 The environment SpinLab</u>
- 2 Let the games begin
 - o <u>2.1 The sessions</u>
 - 2.2 Great discussion about conflicts and disputes
 - 2.3 What about Scrum is "Toxic"
 - 2.4 Learn and advanced visualization
 - 2.4.1 And advanced...
 - 2.5 My session about dynamic team setups
 - o 2.6 Session about value based work units
- 3 The final

The environment – SpinLab

Look at this inspiring pictures from the SpinLab environment... (I can just imaging the spirit startups have in such a surrounding)

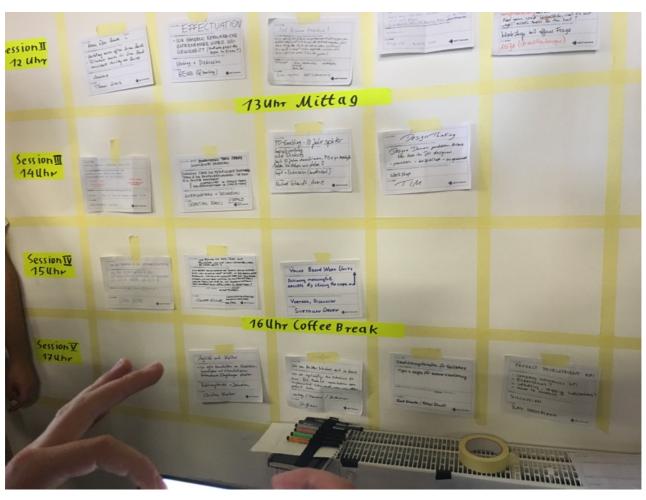

Let the games begin

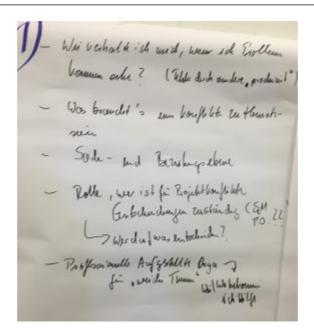

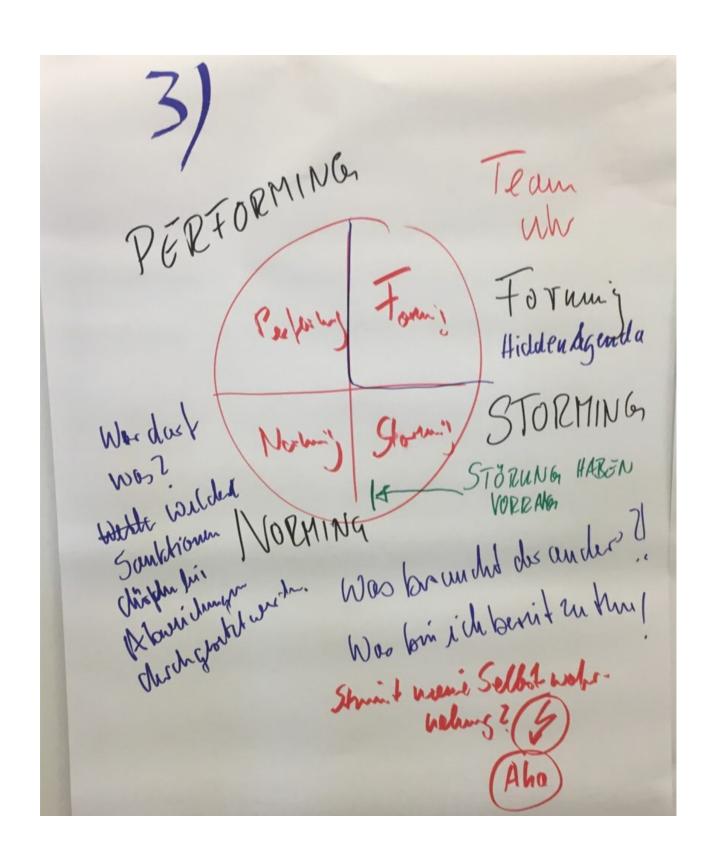

The sessions

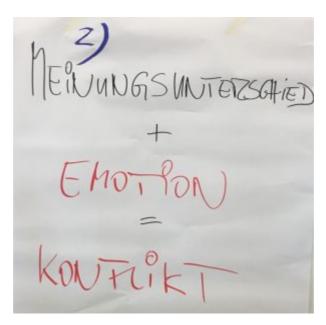

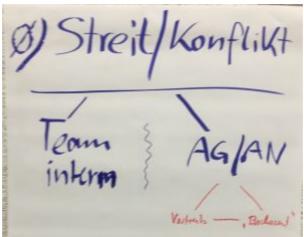

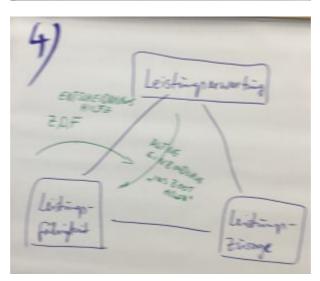

Great discussion about conflicts and disputes

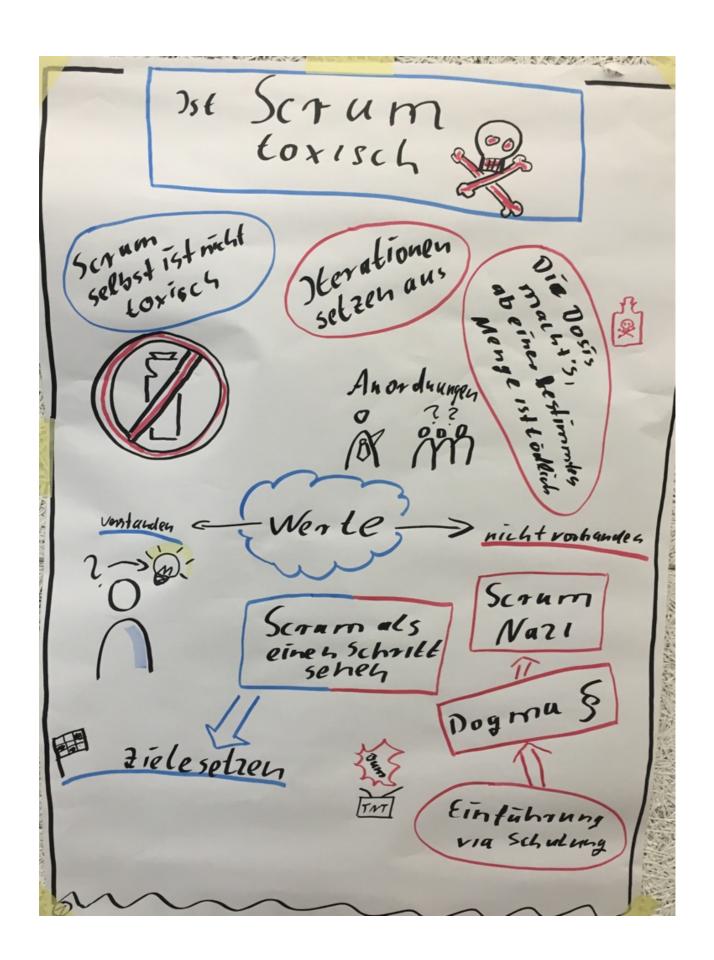

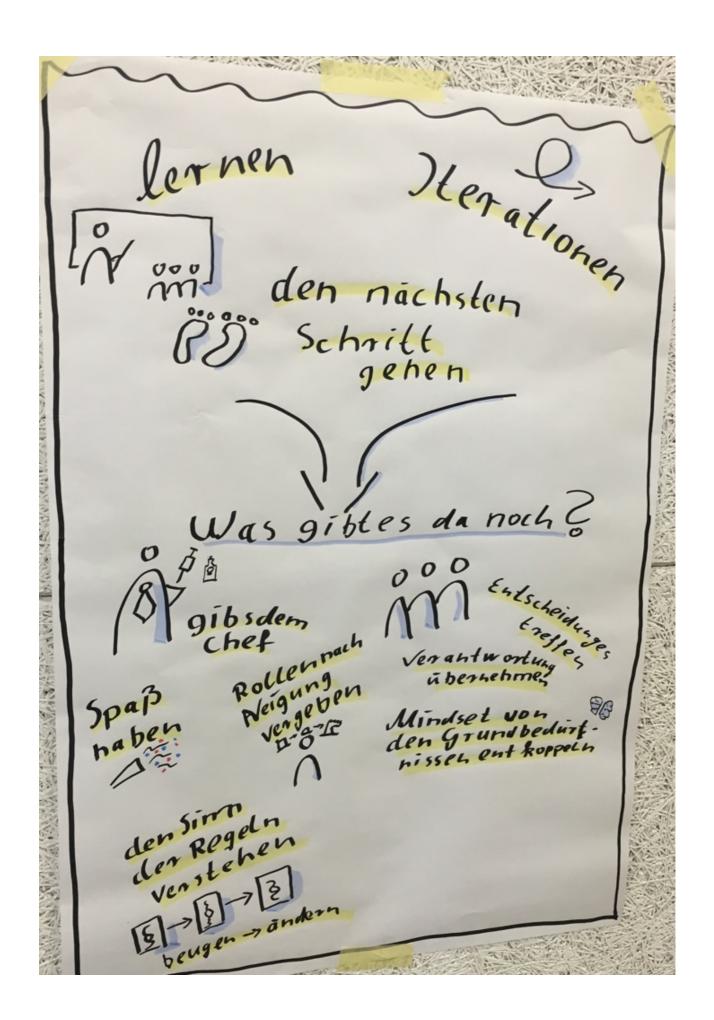

What about Scrum is "Toxic"

Maybe also interesting:

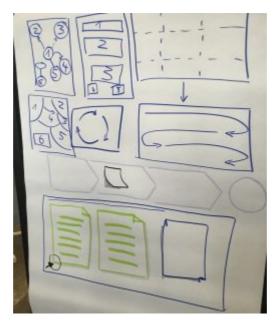

<u>Scrumban [R]Evolution of Scrum – recorded presentation from the Berlin Scrum Meetup</u>

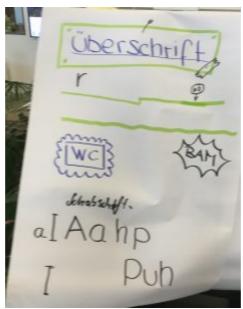

Scrum 3.0 and Organization 4.0 – impressions from a great evening with Boris Gloger at ImmobilienScout24

Learn and advanced visualization

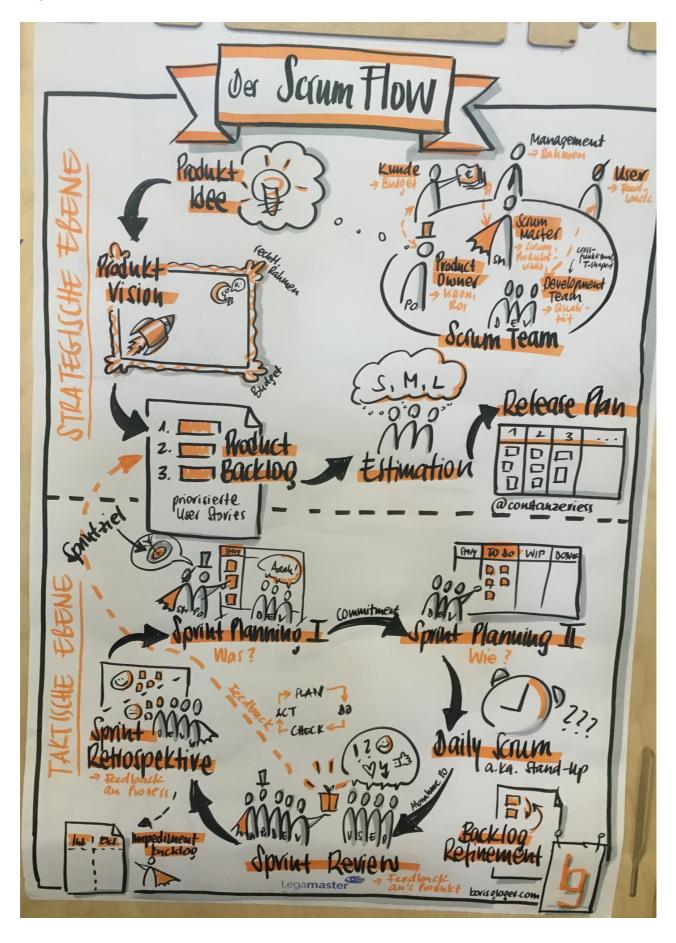

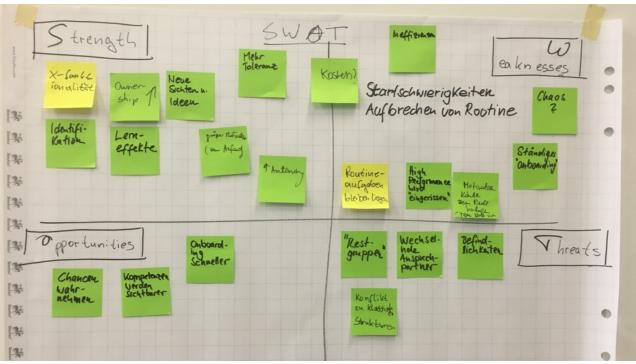

And advanced...

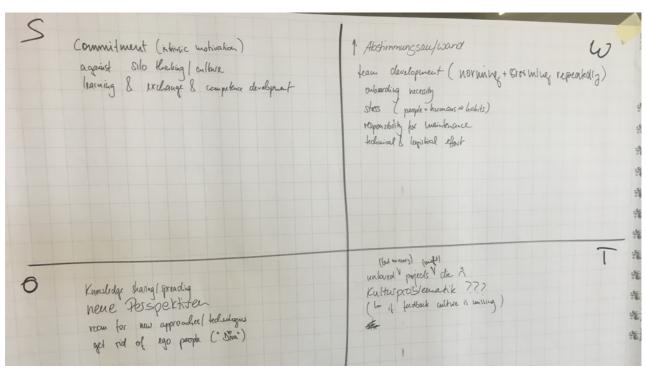

The Scrum workflow visualized in another sessions (that I unfortunately did not join) ... WOW

My session about dynamic team setups

As promised you can find much more information about that topic right here:

Session about value based work units

Value Based Work Unit

Characteristics:

- Meaningful to the customer not only to the people building it
- Can't get smaller without losing it's meaning to the user
- Coherent clear input and output
- Cuts through all the layers not necessarily tech stack layers
- Manageable you have to be on top of your game
- Can stand on it's feet independently

Sequencing:

- Highest risk will reveal a lot and will help you learn a lot
- All requirements are available in the world
- Connected integrates into what already exists

The final
